
Kuehne+Nagel expands its state-of-the-art logistics facility in Geel, Belgium

2017/09/22 16:18 στην κατηγορία INTERNATIONAL

With the extension of the logistics facility in Geel, Kuehne + Nagel will offer an expanded service portfolio especially to customers from the FMCG and pharma & healthcare industries.

After the extension **the warehouse and handling space comprises 77,000 sqm** compared to 45,000 sqm when the logistics center came into operation in 2006. The new complex is equipped with state-of-the-art technology including ESFR sprinklers and a built-in emergency power supply system; goods can be stored up to 12,2 meters high. It complies with strictest security and environmental requirements, is LEED silver standard and TAPA C certified.

At its Geel logistics center Kuehne + Nagel handles end-to-end solutions for major international customers from different industries. The facility serves both as a European and global distribution center hub. Kuehne + Nagel is providing the full range of value added services next to storage, pick & pack and return activities especially for customers from the FMCG industry.

The new building includes **a dedicated and protected pharma zone** which is part of Kuehne + Nagel KN PharmaChain. KN PharmaChain is a global multi-modal logistics solution for temperature-controlled door-to-door transportation which allows accurate traceability of the deliveries and intensive, proactive risk management.

Kevin Nash, Managing Director of Kuehne + Nagel BeLux: “The expansion of the Geel logistics facility enables Kuehne + Nagel to **further strengthen its contract logistics activities in Belgium**. With the extension we responded to customer’s needs who benefit from the prime location in the heart of Europe and our extended service portfolio.”
